SUMMARY

For 6+ years I've built B2C mobile products across sports, media, and betting. I helped lead theScore's media-to-betting ecosystem through its \$2B acquisition by PENN, driving 1M+ linked accounts and real growth in ad and betting revenue. I build and launch data-driven products by defaulting to cross-functional collaboration, and I use AI tools in pursuit of what drives me: solving complex problems and finding the gaps where a product can genuinely help people.

WORK EXPERIENCE

PENN Entertainment | theScore

Product Manager

2022 – 2026

Owned experiences connecting theScore's media & betting products across 20 U.S. & Canadian jurisdictions; transitioned to theScore Bet to focus on live-betting and engagement experiences.

- Led the entire product lifecycle for cross-platform betting experiences through two major U.S. platform migrations → theScore Bet to Barstool Sportsbook to ESPN Bet.
- Advanced live-betting engagement on theScore Bet via live game visualisations and video streaming; contributed to \$3M+ YoY increase in live-wager amounts.
- Used cluster analysis and user research to guide product discovery and delivery for Bet Tracker, increasing ad revenue via repeat engagement, with page views and feature retention holding above 60%.

theScore

Associate Product Manager

2020 – 2022

Accomplished two major milestones; the rebuild of theScore's Android app, and helping build the foundational cross-app experiences as part of theScore's entry into the betting space, leading to \$186M IPO and \$2B acquisition by PENN.

- Led team of 10 Android developers in rebuilding theScore media app (1.5M users), improved retention rates and resulted in faster delivery cycles.
- Implemented foundational cross-app experiences powered by new data structure ('Bet Mode') for initial set of U.S. regional launches of theScore Bet.
- Activated linked-account flows ahead of theScore Bet's Ontario launch; user cohort drove ~80% of gross revenue and 70%+ of wager amounts in year one.

Operations Manager

2014 – 2020

Led customer service and operations teams; also owned the data partnerships that powered theScore for 4M+ MAU.

- Managed third-party data provider relationships — drove accountability across content and API partners via time-to-resolution and adoption metrics
- Maintained 98% user approval rating on first-level support — fed customer insights back into roadmap prioritization
- Established internal data quality and coverage strategies across multiple sports leagues.

EDUCATION & CERTIFICATES
